ABOUT US

Our journey began in 2014 with a vision to transform the working environment of modern offices. With a small team, fueled by determination and a belief in acoustics, we set out to create something exceptional. We were among the few in Europe who understood that the right acoustics can profoundly impact productivity and well-being at work.

The beginning was not easy. We remember countless hours spent on designs and prototypes as we worked to create a soundproof pod that truly performs. Every success and setback brought us closer to our goal. When we first showcased our prototypes at Orgatec 2016, we had no idea what lay ahead. Although our initial product was far from perfect, our dedication, passion, and a bit of luck showed us the way forward.

Just weeks after Orgatec, we won a major contract in Paris, which opened doors for us and allowed for rapid growth. Since then, we have become one of the leading manufacturers of acoustic products in Europe.

Today, after years of hard work and investment, with over a hundred talented individuals on our team, we proudly present our new line that is unmatched on the global market. Every product we create embodies our passion and belief in what we do. SilentLab is not just a company; it's a story of commitment, innovation, and a desire to create a calm and productive working environment for everyone.

KEY ADVANTAGES

LIGHT

Discover the power of light that transforms your workspace. Our pro-cognitive LED lighting mimics natural daylight with an outstanding Color Rendering Index (CRI 98%). With its perfect spectral composition, we enhance focus and reduce error rates.

Our lighting not only benefits your mental well-being and retinal health but also transforms your space into a place where ideas are born. Whether you need to concentrate or relax, you can easily adjust the light intensity to achieve perfect visual comfort.

AIR

Fresh air is essential for effective work.

Our innovative ventilation system ensures rapid and quiet air exchange, allowing you to work uninterrupted for hours on end.

This efficient system is designed with comfort and health in mind, creating optimal conditions for focused work. You can easily adjust the ventilation intensity using the intuitive digital control display, giving you full control over your environment and ensuring maximum comfort throughout your workday.

SILENCE

Our products are the answer to noise in modern open-space offices. Perfectly functioning interior and exterior acoustics ensure a tranquil work environment, allowing you to listen to your own thoughts. With high-quality materials, a quiet ventilation system, and precision-engineered soundproof doors, we achieve the highest possible level of sound isolation.

We focus on achieving the ideal reverberation time and natural clarity of speech, which you will especially appreciate during phone and conference calls.

DESIGN

We have combined a revolutionary acoustic concept with minimalist design to create a functional space that captivates with its elegance. The upholstered surfaces are designed to create an airy and comfortable atmosphere, while carefully selected interior ergonomics ensure maximum comfort and harmony. Our construction utilizes premium materials for perfect sound insulation, while wood and metal details add timeless sophistication.

Our innovative design has been recognized with prestigious awards, including the Red Dot Design Award, iF Design Award, German Design Award, and Good Design Award.

DESIGNERS

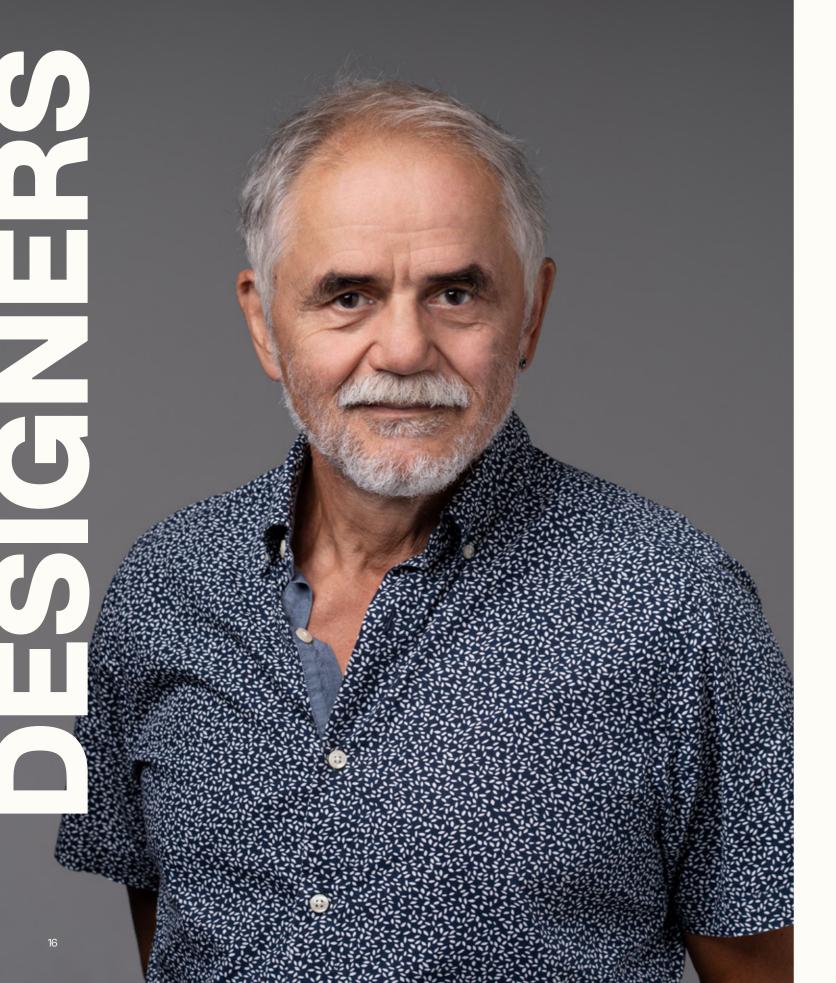

of acoustic pods

VOJTĚCH KAAS & JAN KALIVODA

PROGRES ARCHITEKTI

The architectural studio PROGRES architekti specializes in working with space, matter, light, and materials. Their approach, focused on innovation and pushing the boundaries of technical possibilities, has earned them numerous international awards.

They pay exceptional attention to the quality of indoor environments, where ergonomics, lighting, and acoustics play a crucial role. These experiences were fully utilized in the development of MICROOFFICE, SPARK and the new GEN4 line, where they introduced a modular solution designed to meet various human needs and become a key element of the workplace environment.

DESIGNER of acoustic objects

JIŘÍ PELCL

ATELIER PELCL

Atelier Pelcl, one of the leading design studios in the Czech Republic, boasts years of experience and successful projects both domestically and internationally. The studio specializes in designing public and private interiors, architecture, and furniture, glass, and porcelain design.

The collaboration between SilentLab and Atelier Pelcl resulted in the innovative product SILENT TREE. This nature-inspired design brings a sense of calm and aesthetics to office spaces, serving not only as an acoustic solution but also as a visually appealing addition.

DESIGNERS

of acoustic lights

JAN NĚMEČEK & MICHAL FRONĚK

STUDIO OLGOJ CHORCHOJ

Studio Olgoj Chorchoj specializes in a wide range of design fields, from furniture and glass to architectural projects.

Their work is known for technological precision and collaboration with renowned glassmakers. Their creations have been exhibited in prestigious venues worldwide.

In collaboration with SilentLab, Studio Olgoj Chorchoj designed the acoustic lights DROP and BLOOM. These lights combine aesthetics with functional acoustics, where materials effectively absorb sound, and the design offers flexibility in shape and color variations. The simple yet sophisticated forms easily adapt to various interiors.

SPOT

A pod for quick calls and concentration

SPOT

SPOT is a premium acoustic pod designed for quick calls and peak productivity. Tailored for individual use, it seamlessly merges functionality with aesthetics, creating a tranquil environment for focused work.

ADDITIONAL EQUIPMENT

Do you have high standards? We have a whole range of accessories for the discerning customer. You can choose from a variety of furniture and premium technologies that will elevate the quality of your working environment.

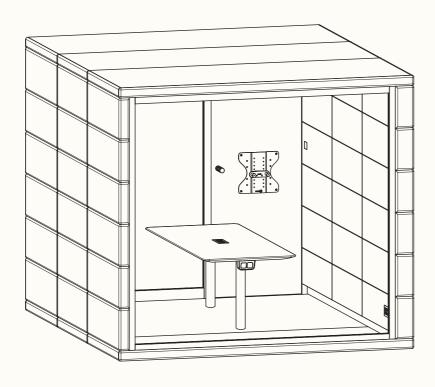

AV CONNECTION SET

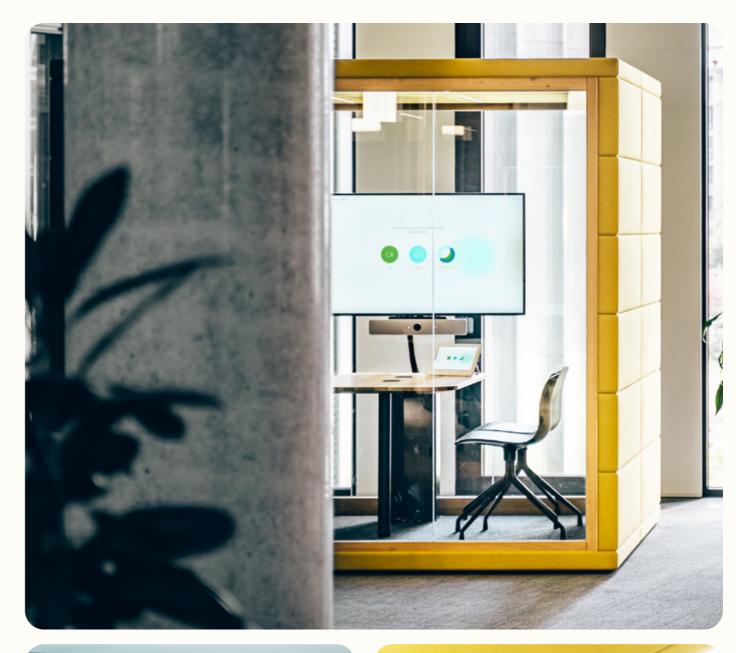

Technical sh

Do you have a client or teammate on the other side of the world? We can deliver our acoustic pods with a complete AV connection set. This makes it easy to install your equipment and the video conferencing experience is almost on par with an in-person meeting.

We can install the AV connection set on the glass wall or on the right side of the panel, whichever you prefer.

STILL

Acoustic wall panels not only improve the overall acoustics in a room, but also serve as a design element. You just need to choose the right shape and a suitable color variant. The advantage of STILL wall panels is that they are designed to absorb the frequencies created by the human voice, reducing background noise while brightening up your office walls.

RESOBAR

The RESOBAR acoustic resonator absorbs specific frequencies in the 250-315 Hz band, which are lower frequencies than standard porous absorbers. For this reason, it is a suitable addition to conference rooms for optimal functionality of AV technology.

Available in a wide range of colours, the Resobar aesthetically enriches the interior and easily matches the STILL design range from SilentLab.

MYSPACE

The best way to separate individual workstations in an open space is to use a desktop acoustic divider. MYSPACE desktop dividers are made of top-quality acoustic foam specially developed for noise absorption. The divider's surface made of a solid, high-quality fabric also serves as a private notice board.

SHADE TIMBER

Set up SHADE TIMBER dividers in the office to instantly create an acoustic barrier that absorbs unwanted sounds. This allows you to dampen, for example, the conversation of colleagues over a cup of coffee or the noise of the printer. The dividers are very easily portable and you can position them to suit your needs and your office layout.

Technical she

MATERIAL LINES

Have you chosen the best acoustic solution for your office? Now you can choose from a range of colors in one of our three material lines.

SOFT

The basic SOFT series is the most affordable version of our products. It combines functionality and simplicity of materials, BOMBAY fabrics look professional and warm at the same time. They are also water-repellent and stain-resistant.

AMBIENT

The AMBIENT mid range presents two attractive options. ASPECT textiles with a soft, touchable pattern that is made of Trevira CS flame retardant fiber. The second option is WOOLLAND, a durable fabric made of natural wool fibers treated to be flame retardant and water repellent.

PULSE

The top of the range PULSE puts the emphasis on superior texture and an excellent tactile experience thanks to its natural materials.
